

Have you ever had trouble choosing a movie to see and figuring out the logistics?

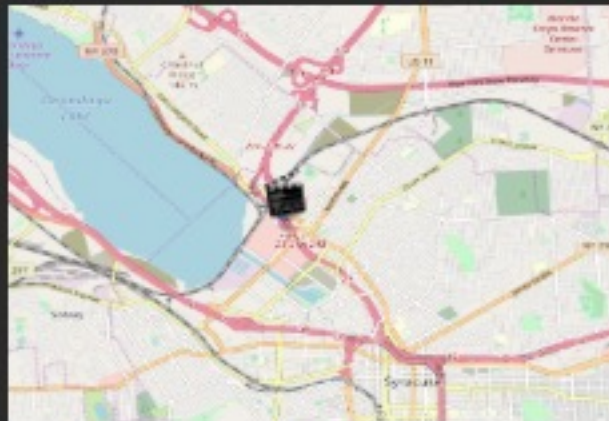

Introducing...

Movie Matcher

This program allows users to see their location in proximity with Destiny USA on a map. It will then display what movies are showing, their rating, genre, and rotten tomatoes score. The movie times will also be displayed. This will enhance users decision making process by displaying information in a user friendly manner.

After the user enters all of their preferences, they are given the option to see their price total and further purchase the tickets right in the program and have their receipt and tickets emailed to them.
